## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Group I, claims 1-15 in the reply filed on 9-2-05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 16-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9-2-05.
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 8-10 and 13-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 8-10 are drawn to "The process cartridge of claim 6" where claim 6 is drawn to an image forming apparatus. The Examiner suggests changing the preamble of claims 8-10 to read: --The image forming

apparatus of claim 6--. Similarly, claims 13-15 are drawn to "The process cartridge of claim 11" where claim 11 is drawn to an image forming method. The Examiner suggests changing the preamble of claims 8-10 to read: --The image forming method of claim 11--.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saiki (6,671,476) in view of Hirota (6,733,945). Saiki teaches an electrophotographic process cartridge and related apparatus and imaging methods where the developer storage space is divided in to a first and second storage portion in a vertical arrangement (col. 1-2 and claims). Saiki does not specify that the developer has a compression ratio in the range of 0.30 to 0.40. Hirota teaches a developer with a compression ratio in the range of 0.30 to 0.40 used to increase flowability, improve fixing and imaging of the developer (col. 16 lines 23-39, col. 18 lines 52-64, and col. 19 lines 50-66). It would have been obvious to one of ordinary skill in the art to use the developer taught by Hirota in the process cartridge taught by Saiki because of the expectation of improved results due to increased flowability, improve fixing and imaging of the developer as directly suggested by Hirota and the well known effect of developer movement in process cartridges.
